1. Public / Before Login

1.1. Landing Page

Purpose:

To introduce the SoulNote platform and invite users to start capturing their memories. It highlights the app's core value: a private space to store photos, voice notes, and emotions.

Content:

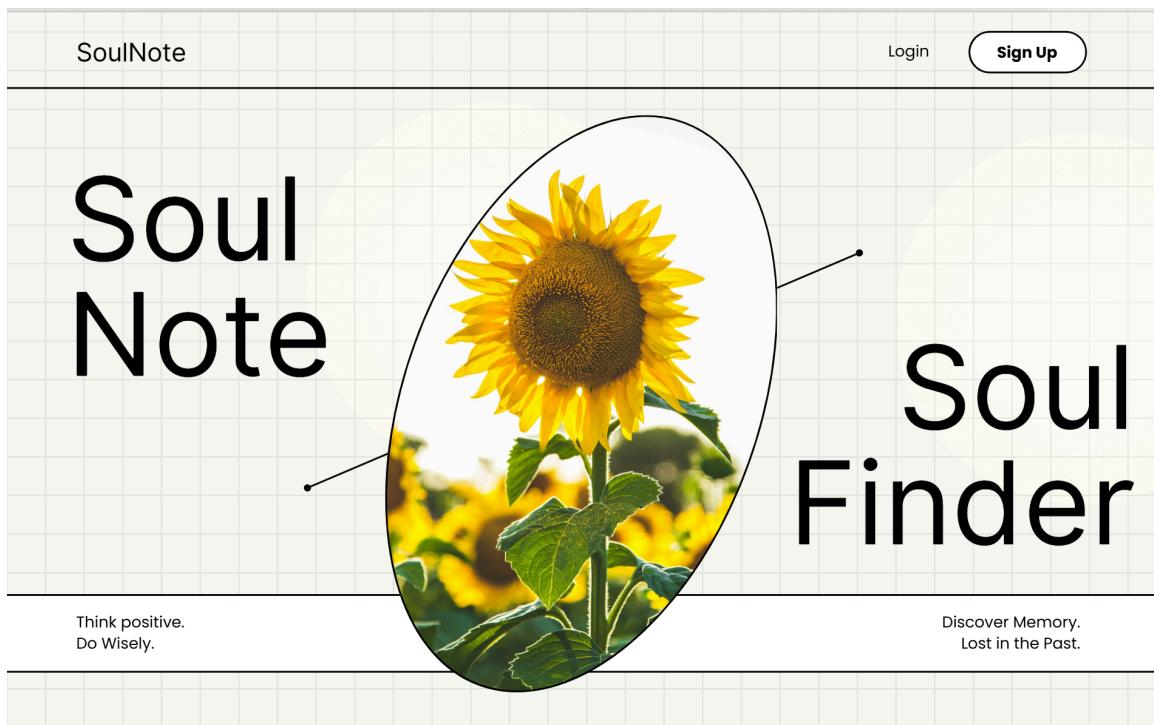

- **Logo & Branding:**
Located at the top-left corner, the logo features a circular icon with an emotion symbol next to the brand name "SoulNote."
 - **Top Navigation (Top-right):**
Includes two links:
 - Login
 - Sign up
 - **Main Headline (Center-aligned):**
 - “Capture your memories. Feel them again.”
 - Displayed in bold, large font to draw attention and convey emotional appeal.
 - **Subheadline (Tagline):**
 - “A private diary to store your photos, voice and feelings – beautifully.”
 - Briefly describes the core functionality of the app.
 - **Call-to-Action Button:**
 - A black button labeled “Get Started,” encouraging users to begin their SoulNote journey.
 - **Memory Preview Card:**
 - A mock-up memory card is shown below the CTA:
 - **Left section:** Includes a sample date (04/02/2025), location (Ho Chi Minh City), hashtags (#life, #city), and placeholder text simulating a memory entry.

- **Right section:** Displays a colorful image of sticky notes — symbolizing diverse, vivid memories.
- **Footer:**
 - Contains links: About, Contact, Terms
 - Copyright text: “© 2025 SoulNote”

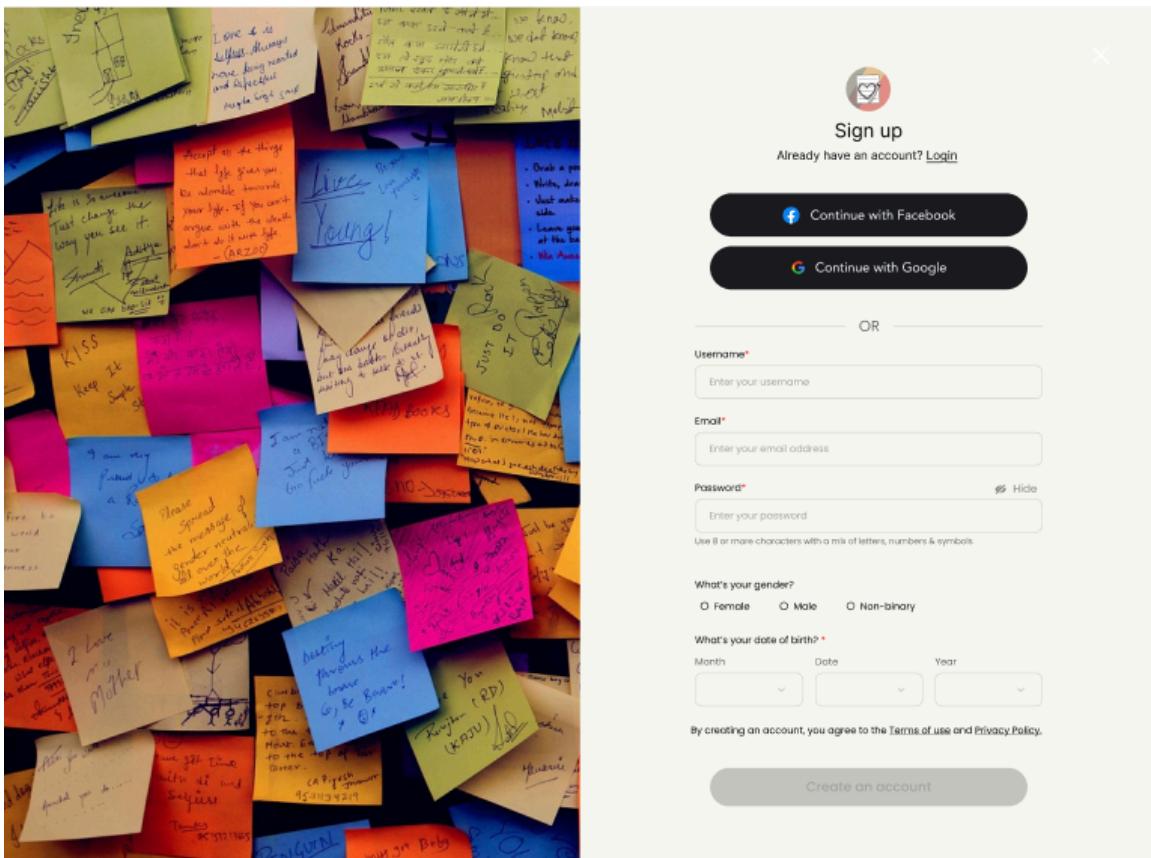

User Interaction:

- Users can click the “Get Started” button to proceed with using the app.
- Login and Sign up options are available for account access.
- The mock memory card serves as a visual teaser of what users can create within the app.

Alternative UI:

1.2. Register

Purpose:

To allow new users to create an account on SoulNote using social login or by filling out a registration form.

Layout Overview:

Split-Screen Design:

- **Left Side:**
A full-height vibrant background image of colorful sticky notes with handwritten thoughts and drawings – symbolizing memories, thoughts, and personal expression.
- **Right Side:**
The actual sign-up form with a clean, minimalistic design on a light background for readability and focus.

Content & Elements:

Top Section:

- **App logo** centered at the top.
- **Title:** “Sign up”
- **Login prompt:** “Already have an account? Login” (with “Login” as a clickable link)

Social Sign-In Options:

- Continue with Facebook button (with Facebook icon)
- Continue with Google button (with Google icon)
→ Both styled as full-width rounded buttons with icons.

Divider:

- A horizontal line with the word “OR” centered between the social and manual sign-up methods.

Sign-Up Form Fields:

- **Username** – text input
- **Email** – email input
- **Password** – password input with hide/show toggle
 - Instructional note: “Use 8 or more characters with a mix of letters, numbers & symbols”
- **Gender selection** (radio buttons):
 - Female
 - Male
 - Non-binary
- **Date of Birth** (dropdowns):
 - Month
 - Date
 - Year

Legal Agreement:

- A short notice:
“By creating an account, you agree to the Terms of use and Privacy Policy.”
(with both phrases linked)

Call-to-Action Button:

- Create an account – disabled state by default until the form is filled out correctly.

User Interaction:

- Users can sign up via Facebook or Google for speed.
- Alternatively, they can fill out the form manually.
- The date of birth and gender fields ensure personalization and possible content tailoring.
- The CTA button becomes active once required fields are filled.
- Clear error handling and field validations are expected (though not visible in the static image).

1.3. Login

Purpose:

To allow existing users to securely access their SoulNote account via social login or email/password

Layout Overview:

Split-Screen Design:

- **Left Side:**
A full-height image featuring colorful sticky notes with handwritten messages – visually aligned with SoulNote's memory and diary theme.
- **Right Side:**
A clean, minimal login form on a light background, ensuring readability and focus.

Content & Elements:

Top Section:

- **App logo** (small icon with a smiling face in a circle).
- **Title:** "Log in"
- **Sign-up Prompt:** "Doesn't have an account? Sign up"
 - "Sign up" is a clickable link leading to the registration page.

Social Login Buttons:

- Continue with Facebook (rounded white button with Facebook icon)
- Continue with Google (rounded white button with Google icon)
 - Quick login options for users with linked social accounts.

Divider:

- A centered “OR” with horizontal lines on each side – separating social and traditional login methods.

Email & Password Fields:

- **Email** input
- **Password** input with toggle to show/hide password
 - Includes a small eye icon for visibility toggle.

Additional Options:

- **Remember me** checkbox
- **Forgot your password?** – clickable link for password recovery

Login Button:

- Log in – initially in a **disabled** (greyed out) state until valid credentials are entered.

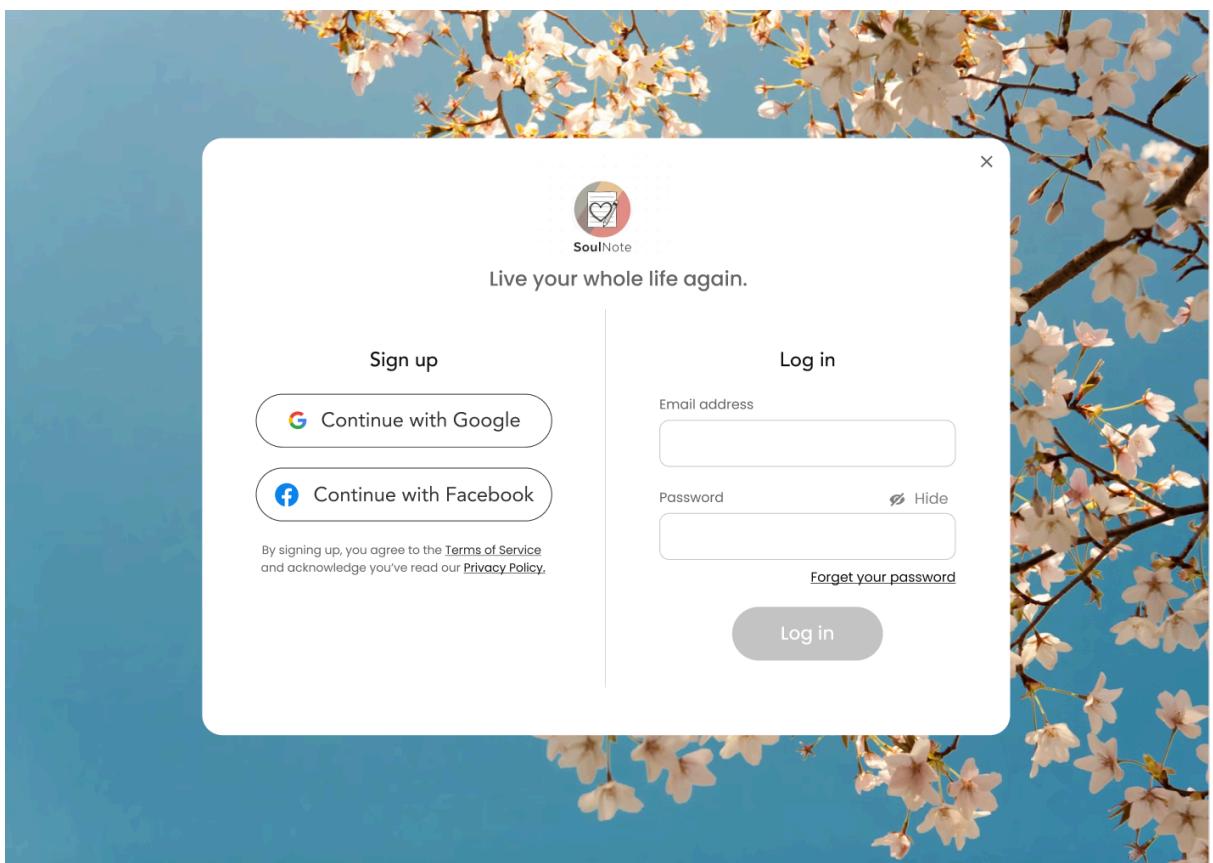

Close Button (Top-right corner):

- A simple “X” to close the login modal or return to the previous screen.

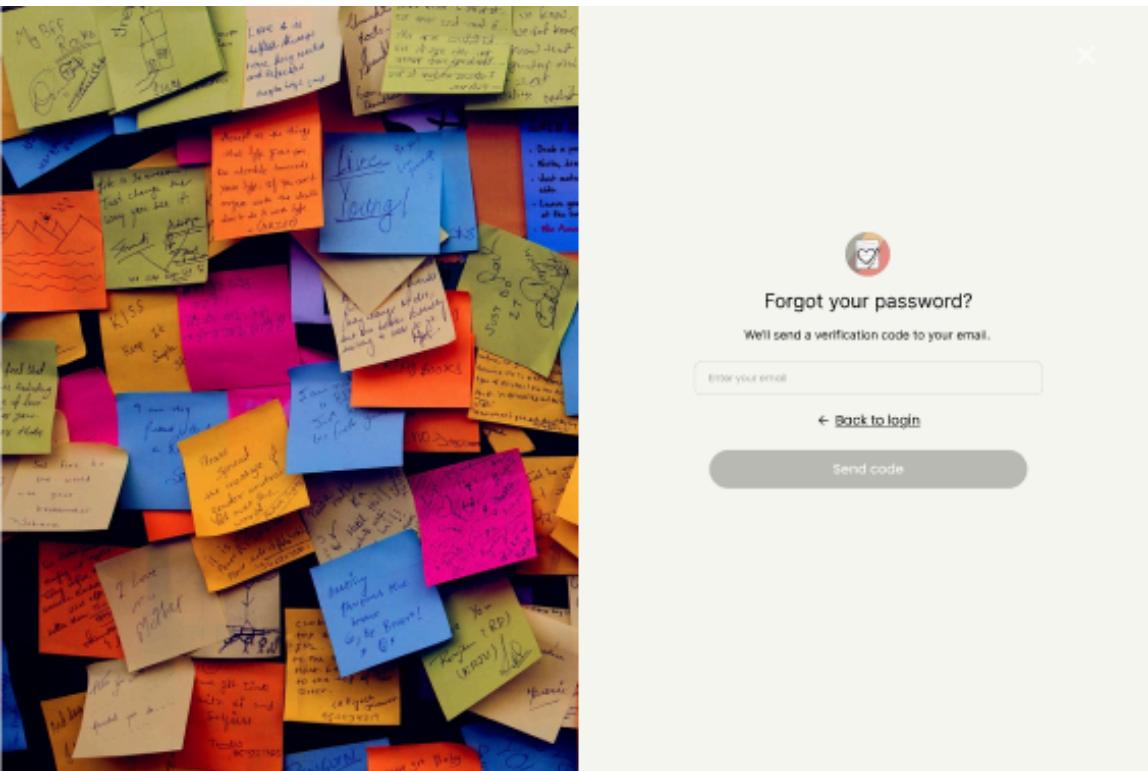

User Interaction:

- Users can:
 - Log in quickly via Facebook or Google.
 - Enter their email and password manually.
 - Choose to have their credentials remembered for future sessions.
 - Recover access via the "Forgot your password?" link.
- Form validation likely occurs before enabling the login button.

Alternative UI:

1.4. Reset Password

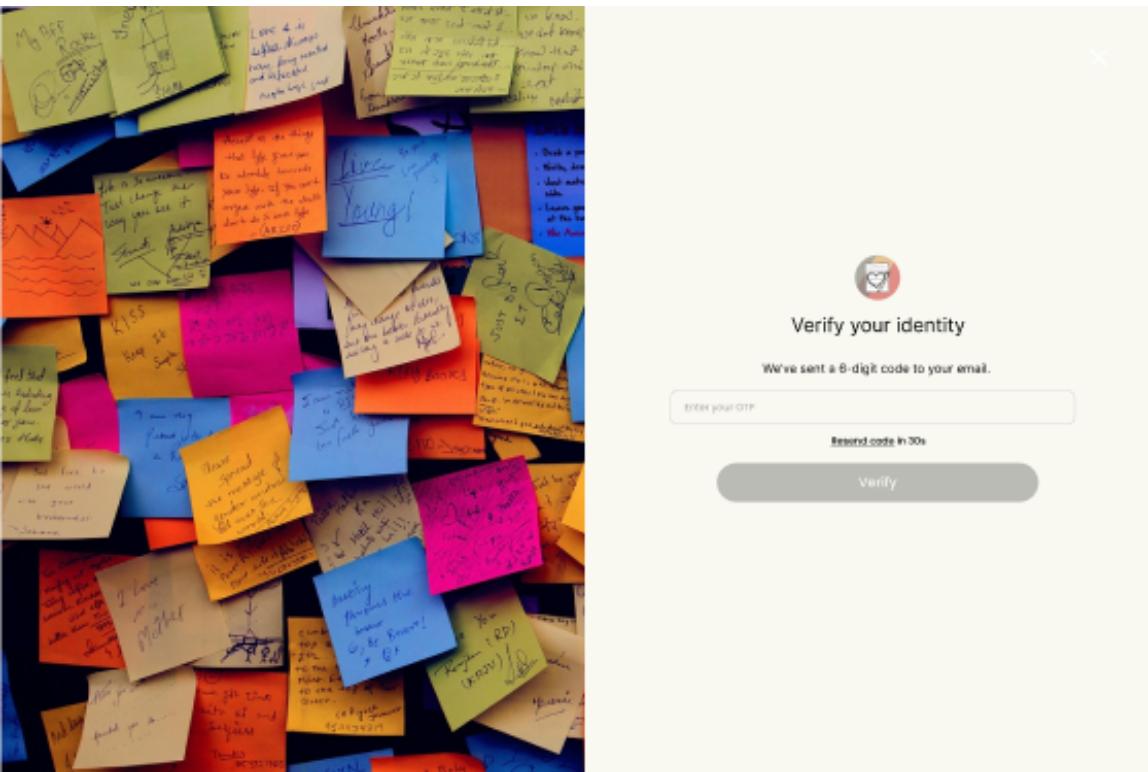

Forgot your password?

We'll send a verification code to your email.

Enter your email

[← Back to login](#)

[Send code](#)

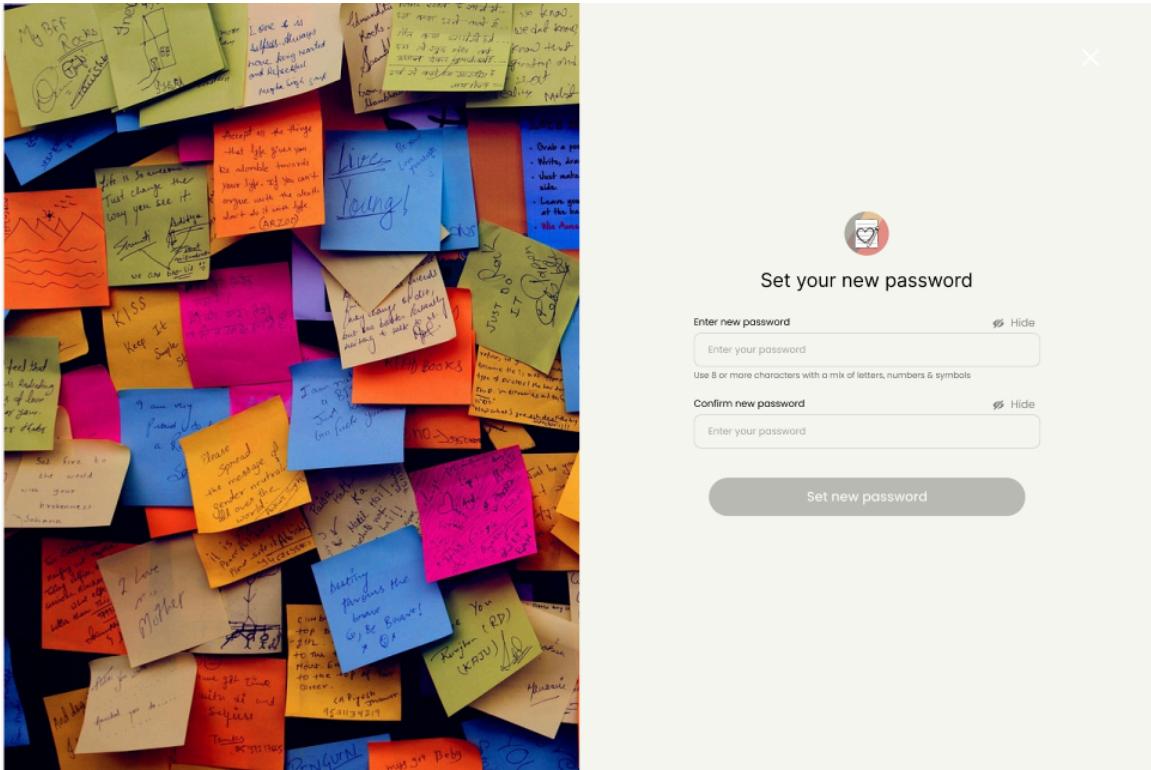

Verify your identity

We've sent a 6-digit code to your email.

Enter your OTP

[Resend code in 30s](#)

[Verify](#)

Purpose:

To allow users who have forgotten their password to securely reset it through email verification and password re-entry. The flow ensures account safety while providing a clear, step-by-step recovery process.

Content: This flow consists of 3 sequential screens, all using a **split-screen layout**:

1. Forgot Your Password

- Left side: Background image of colorful sticky notes (consistent with SoulNote branding).
- Right side:
 - Title: *Forgot your password?*
 - Subtitle: *We'll send a verification code to your email.*
 - Input field: Enter your email
 - Buttons:
 - ← Back to login (text link)
 - Send code (primary button, initially disabled)

2. Verify Your Identity

- Left side: Same sticky note background
- Right side:
 - Title: *Verify your identity*
 - Subtitle: *We've sent a 6-digit code to your email.*
 - Input field: Enter your OTP
 - Resend timer text: *Resend code in 30s*
 - Button: Verify (disabled until input is filled)

3. Set Your New Password

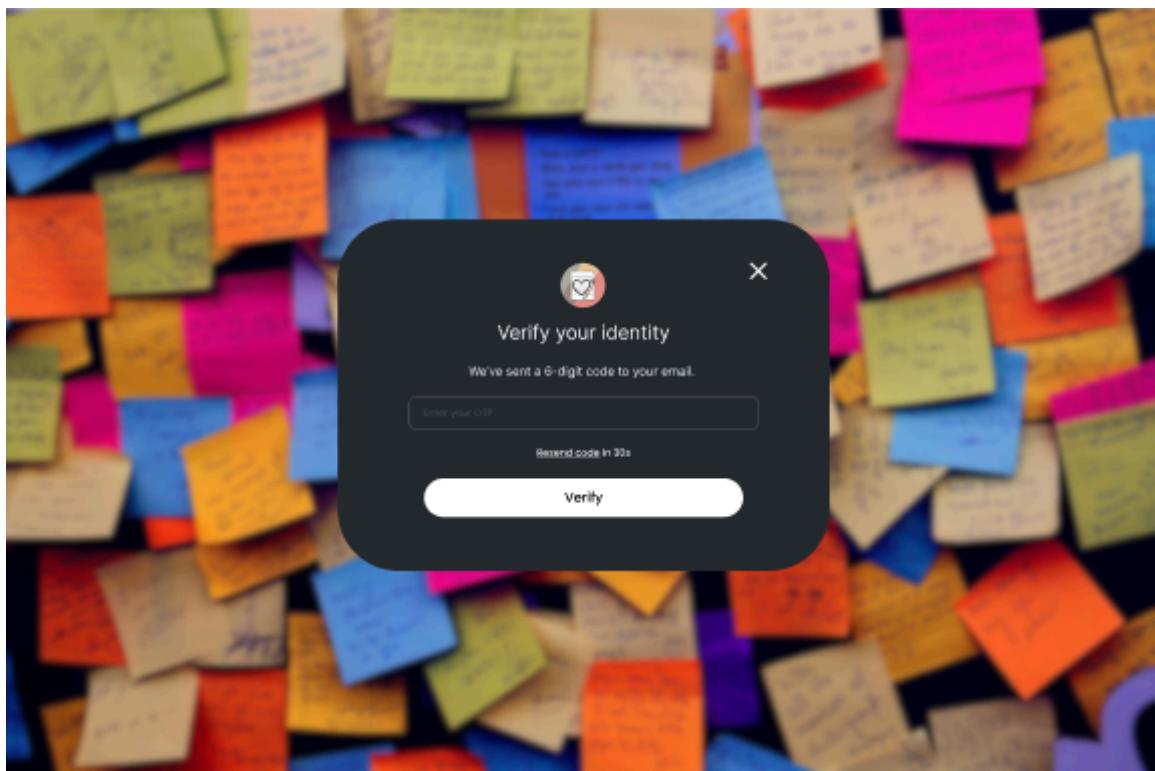

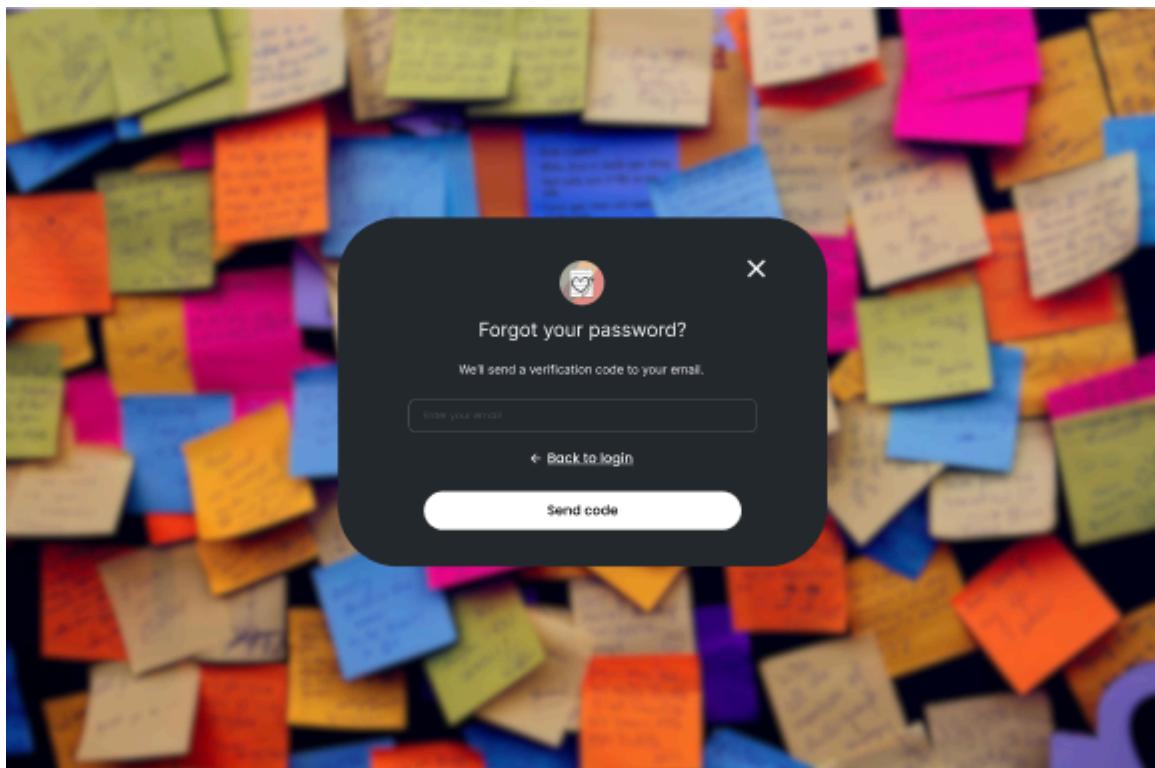

- Left side: Same sticky note background
- Right side:
 - Title: *Set your new password*

- Input fields:
 - Enter new password
 - Confirm new password
- Show/Hide toggle icons (for password fields)
- Button: Set new password (enabled only if both fields match)

User Interaction:

1. **Step 1 – Request Code**
 - User inputs their email address.
 - Once a valid email is entered, the Send code button becomes active.
 - Clicking the button sends a 6-digit OTP to the user's email and moves to the next screen.
2. **Step 2 – Enter OTP**
 - User inputs the OTP received via email.
 - A timer prevents immediate resending (e.g., 30 seconds).
 - When a valid code is entered, the Verify button activates.
 - Clicking Verify proceeds to the password reset screen.
3. **Step 3 – Set New Password**
 - User enters and confirms a new password.
 - Real-time validation ensures passwords match before enabling the Reset password button.
 - Submitting the form updates the password and (presumably) redirects to the login screen.

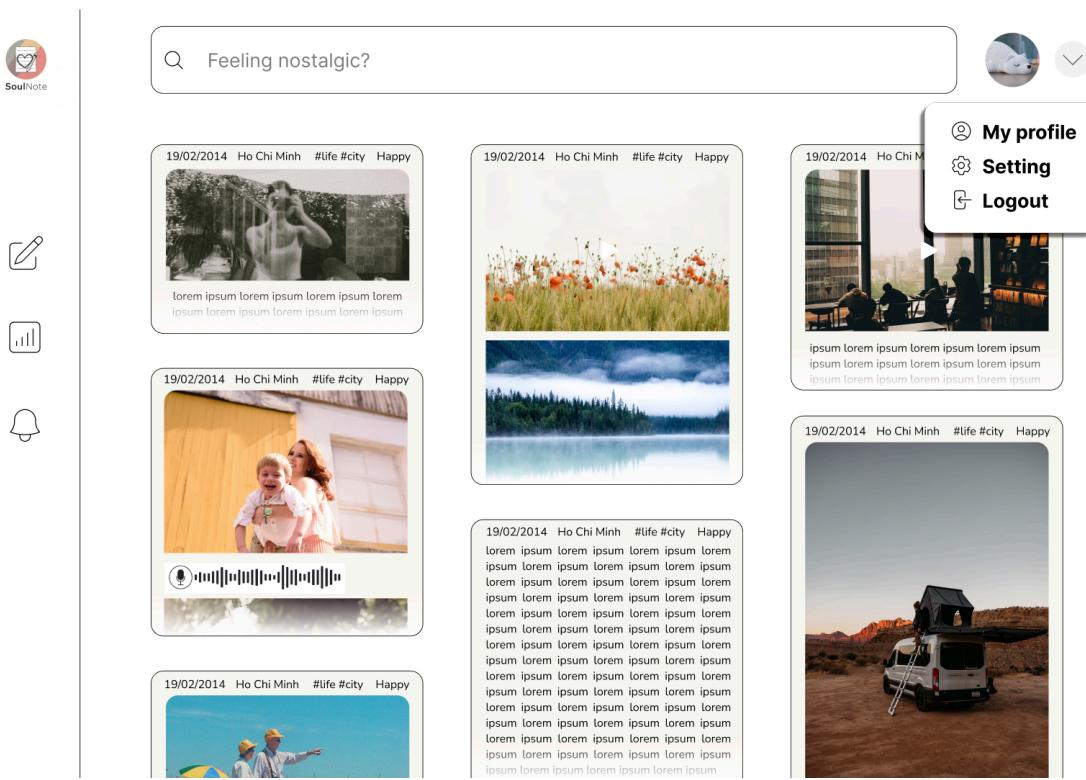

Alternative UI:

2. Main Features / After Login

2.1. Dashboard

Purpose:

This screen allows users to view all the memories they have previously created on the SoulNote platform.

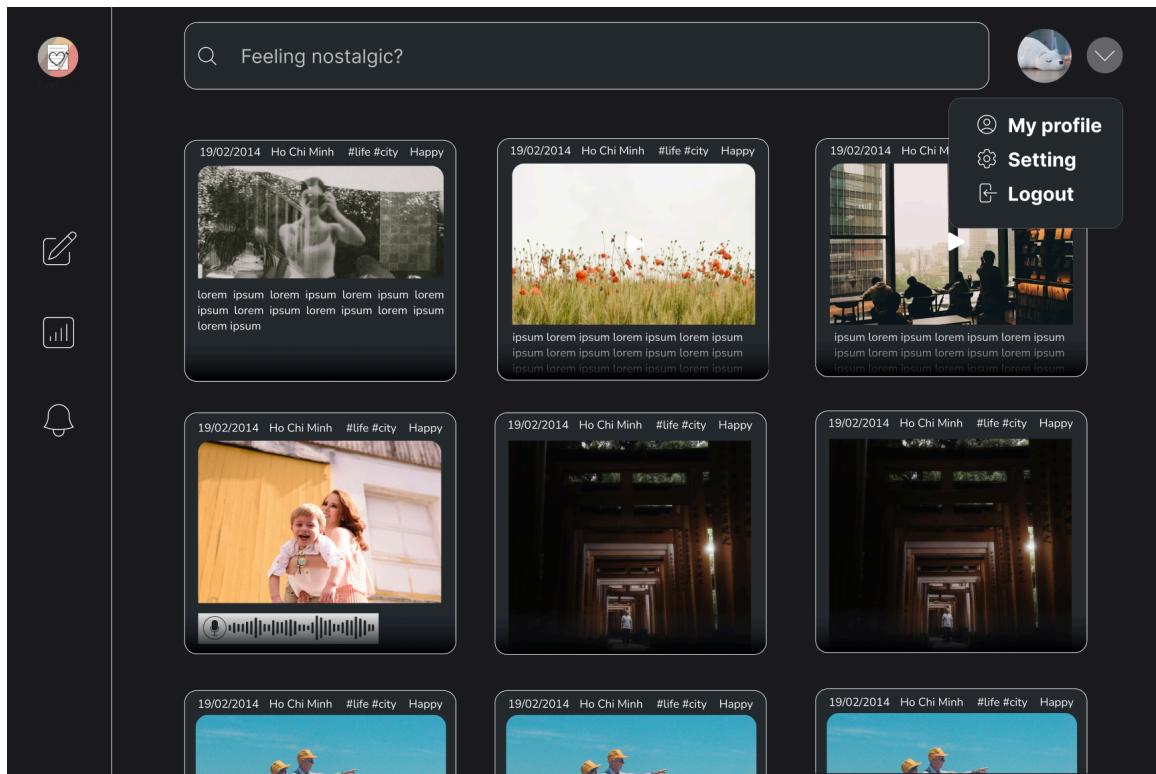

Content:

- Memory cards (shapes) displaying each individual memory
- Left sidebar with:
 - Button to view notifications
 - Button to create a new memory
 - Button to access emotion analysis
- Top navigation bar with:
 - Search bar to find specific memories
 - User avatar on the right with a dropdown menu:
 - My Profile
 - Settings
 - Logout

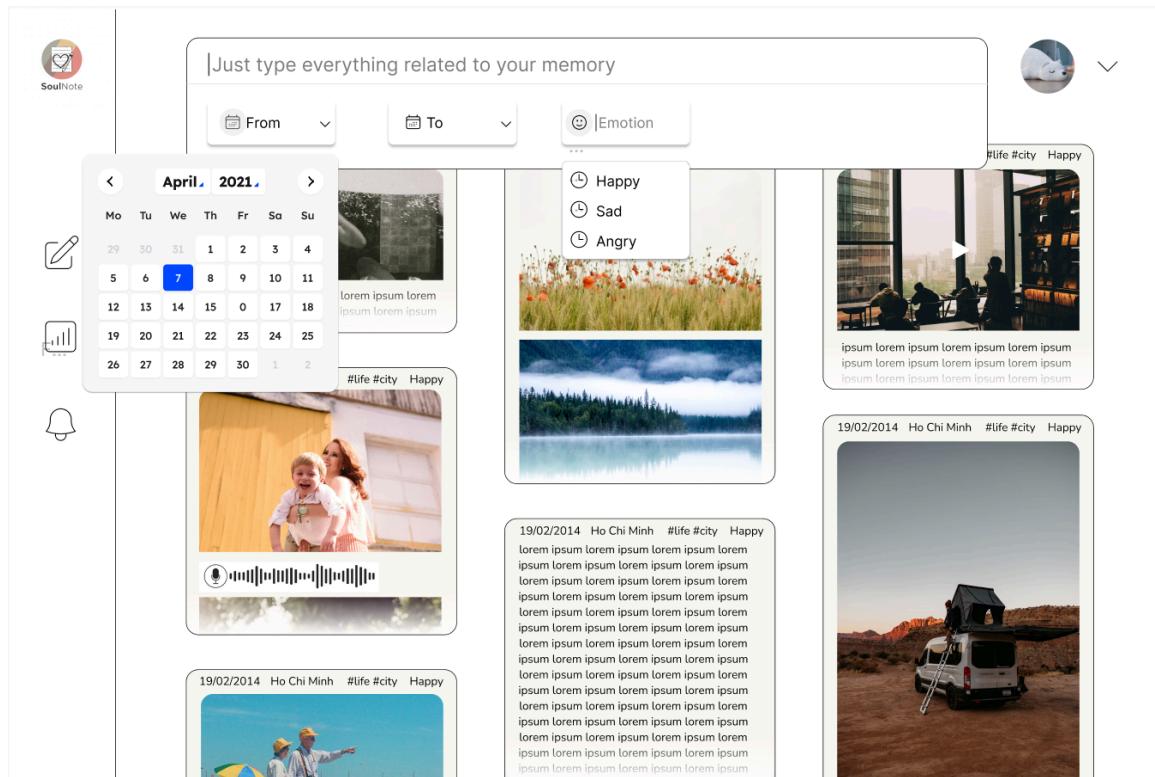

User Interaction:

Users can scroll through and click on memory cards to view or edit them. They can use the sidebar for quick navigation to features like creating a memory or viewing emotion insights. The search bar helps locate specific entries, and the avatar dropdown provides access to account-related settings.

Alternative UI:

2.2. Search and Filter

Purpose:

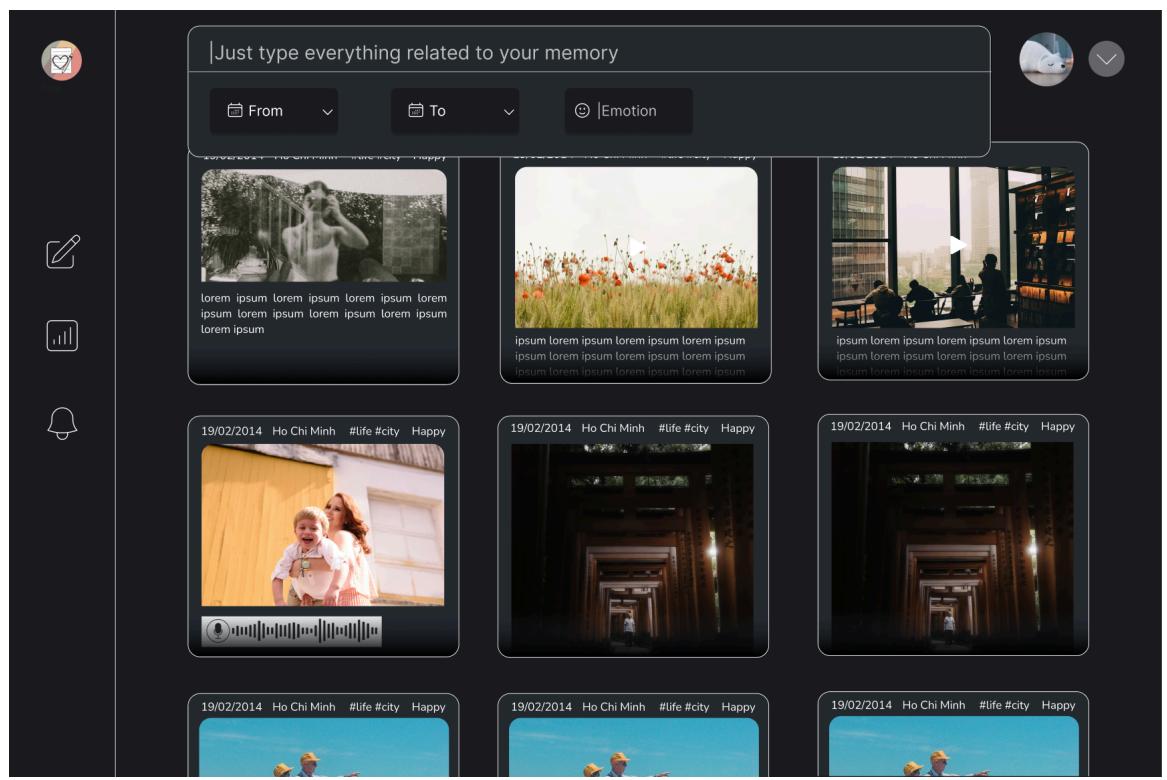

This screen enables users to search for specific memories using keywords and apply filters to narrow down results based on time range and emotional tags.

Content:

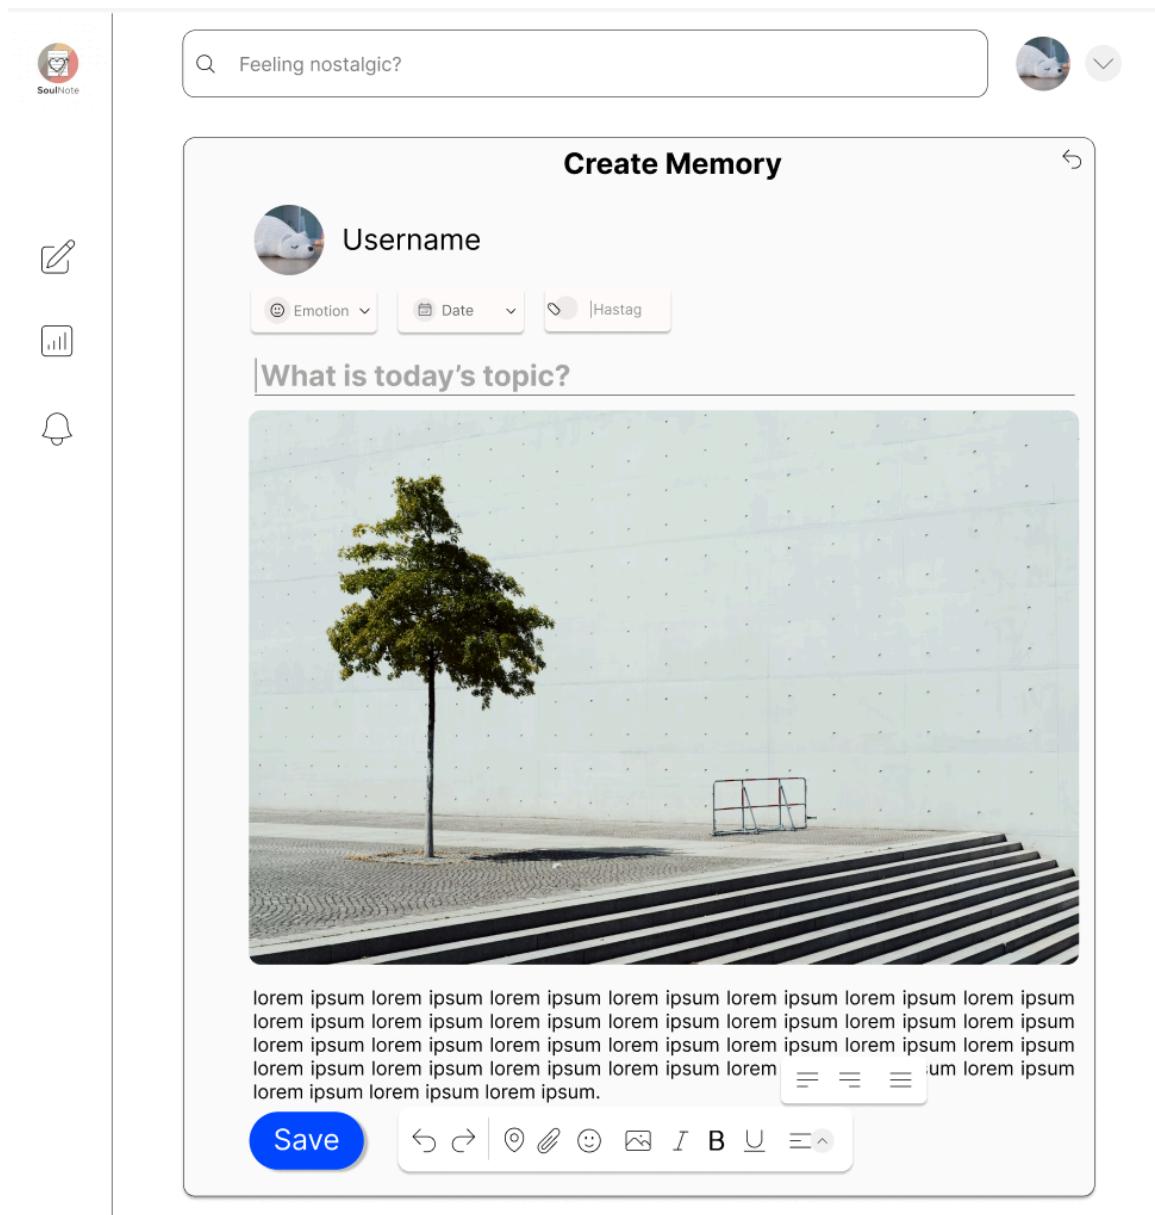

- Background content is the **Dashboard view** showing memory cards
- Top search bar with placeholder text
- When activated, the search expands to reveal:
 - **From** date picker (starting date)
 - **To** date picker (ending date)
 - **Emotion** filter dropdown with search history (e.g., Happy, Sad, Angry)
- Filtered results are shown dynamically as memory cards below

User Interaction: Users can type keywords into the search bar, and optionally filter by a date range or emotion. Results are updated in real time based on the criteria. This helps users quickly locate relevant memories based on time and feeling.

Alternative UI:

2.3. Create/Edit Memory

Purpose:

This screen allows users to create a new memory by writing content, attaching media, and tagging metadata such as date, emotion, and hashtags.

Content:

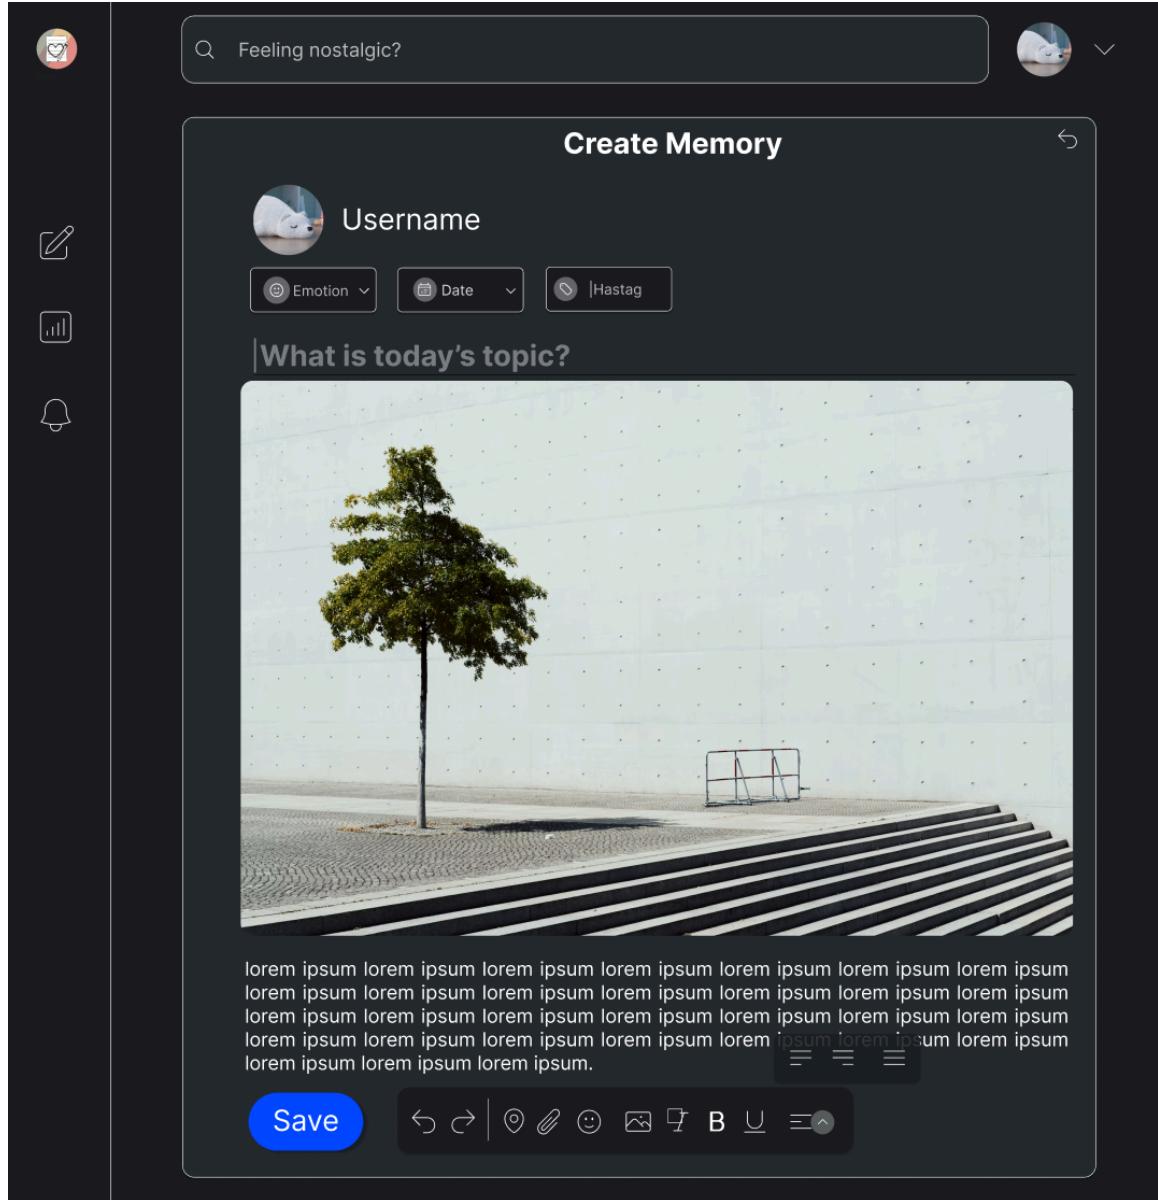

- Memory Creation Form includes:
 - User profile name and label “Create Memory”
 - Dropdown fields for:
 - Emotion (predefined list of emotions)
 - Date (calendar picker only, not manually editable)
 - Hashtag (multiple tags allowed)
 - Title input field for memory topic
 - Media upload area (image or video preview)
 - Text editor for writing memory details with basic formatting tools (e.g., bold,

underline, alignment)

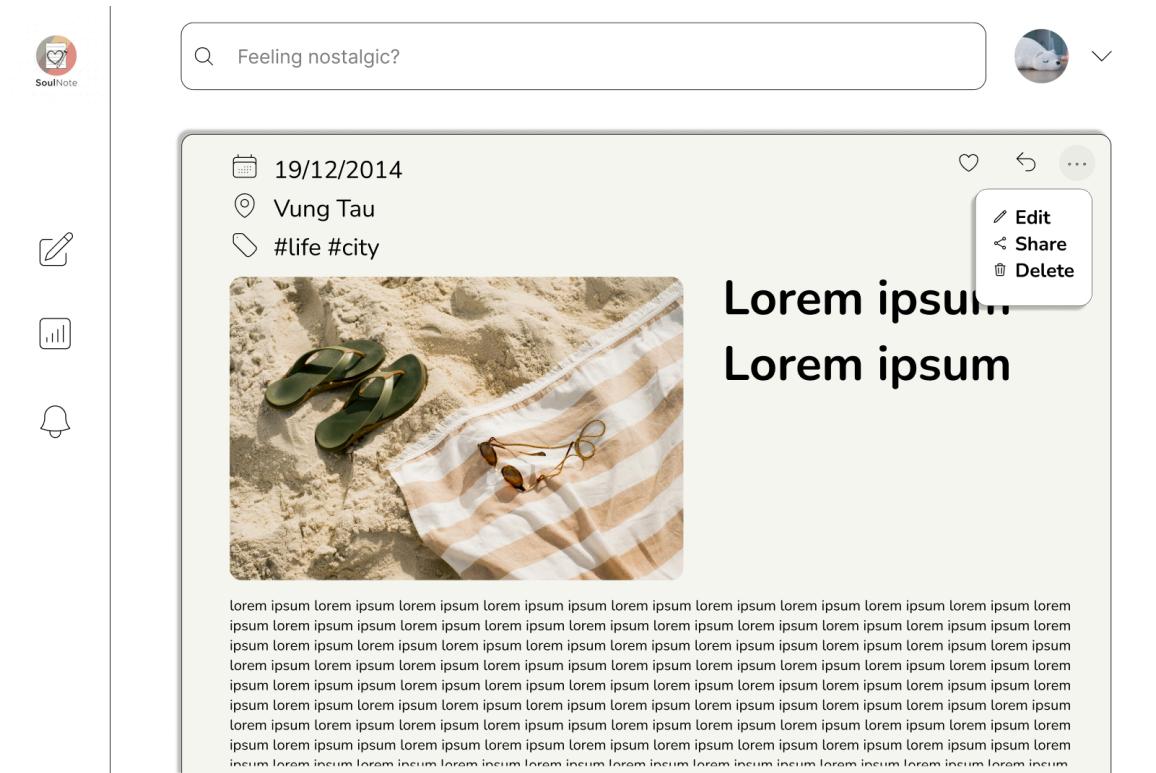

- Save button to store the memory
 - Back button (top-right corner): allows users to exit memory creation and return to the dashboard without saving

User Interaction: Users can choose an emotion, date, and hashtags using dropdowns, type and format content in the editor, upload and preview media, and save the memory with the Save button. If they change their mind, they can click the Back button to exit without saving.

Alternative UI:

2.4. Memory Thread's Detail

Purpose:

This screen allows users to view the full version of a selected memory from the dashboard, including all associated media, metadata, and content.

Content:

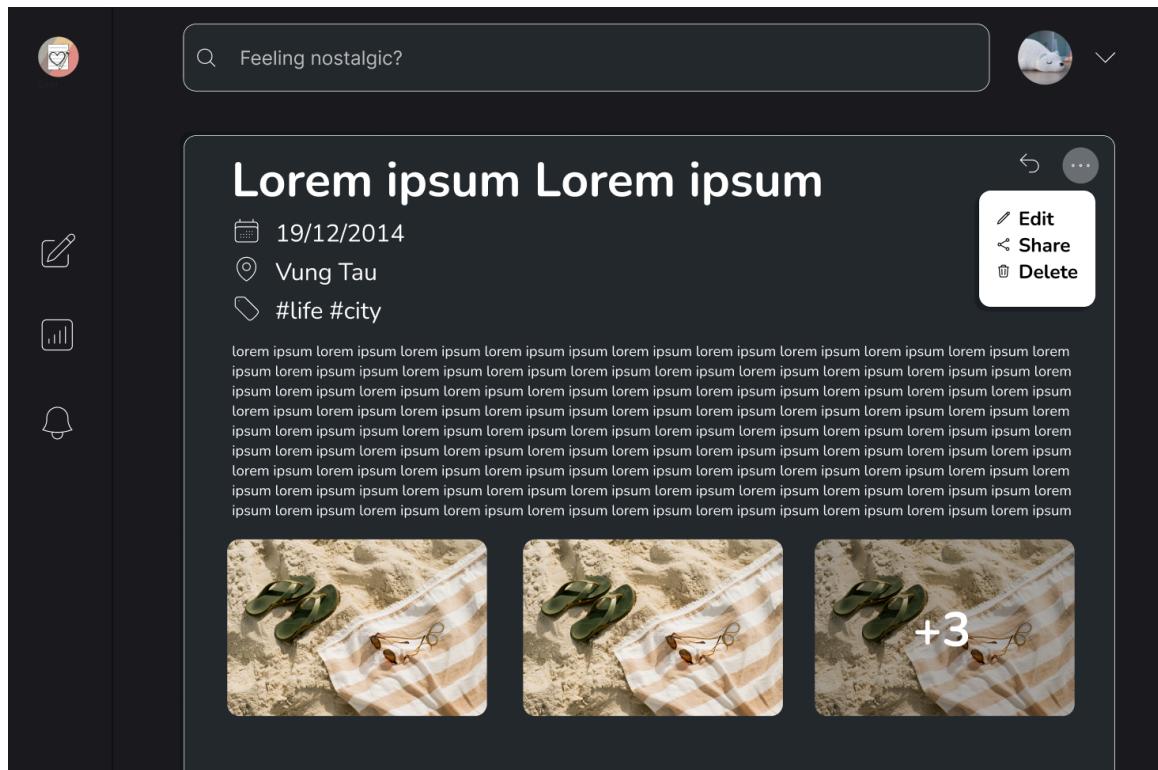

- Same top bar and sidebar as the Dashboard:
 - Top: search bar, user avatar with dropdown (My Profile, Settings, Logout)
 - Left sidebar: buttons to create a new memory, view emotional analysis, and notifications
 - Main memory detail shape includes:
 - Date of the memory
 - Location (e.g., Vung Tau)
 - Hashtags (e.g., #life, #city)
 - Favorite (heart) icon
 - Back button
 - Options button (three dots) with dropdown:
 - Edit
 - Share
 - Delete

- Media content (e.g., image or video)
- Memory title
- Full memory text/content

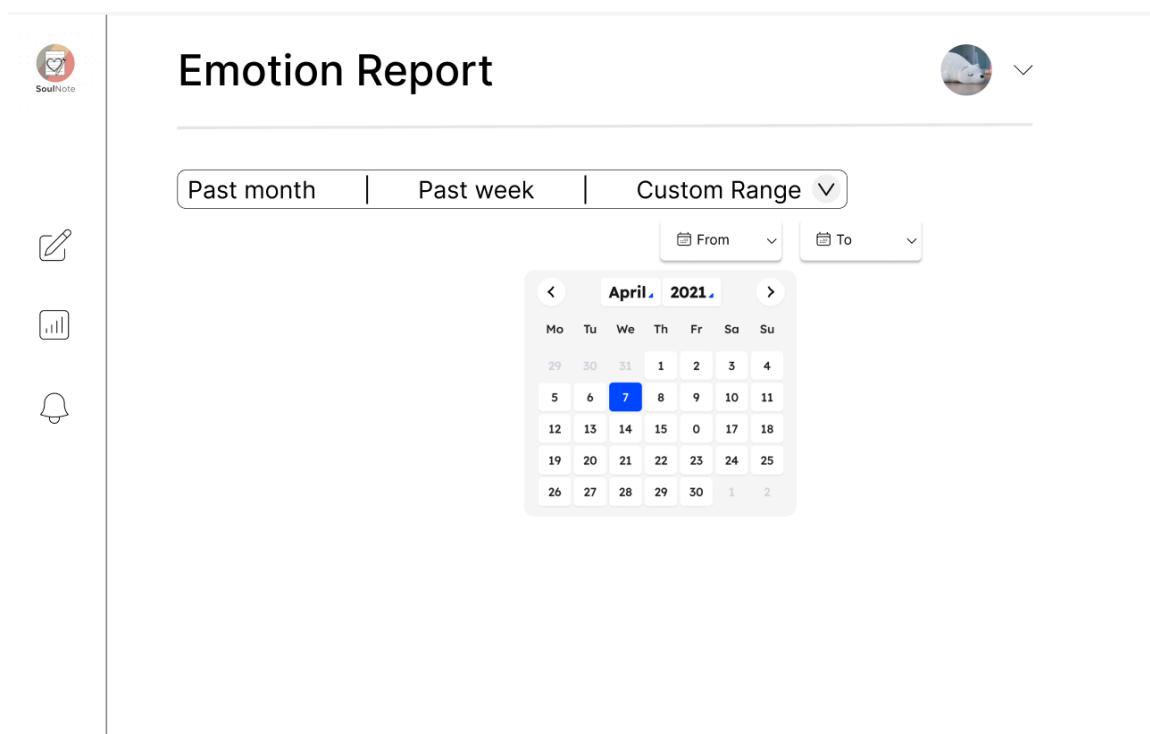

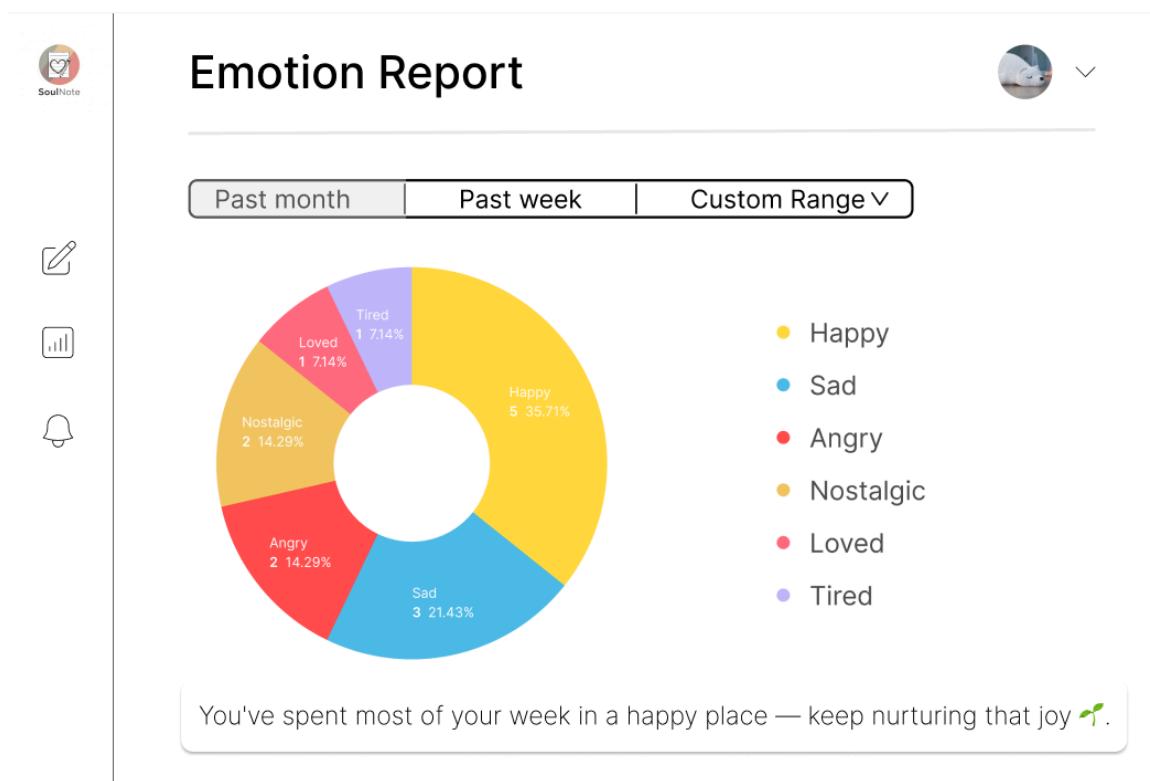

User Interaction:

Users can read the entire memory, view associated media, and take actions such as favoriting, editing, sharing, or deleting the memory. Navigation elements allow them to return to the dashboard or use other main features via the sidebar or avatar menu.

Alternative UI:

2.5. Emotion Report

Purpose:

This screen allows the user to view and analyze their emotional trends over time through visual chart representations.

Content:

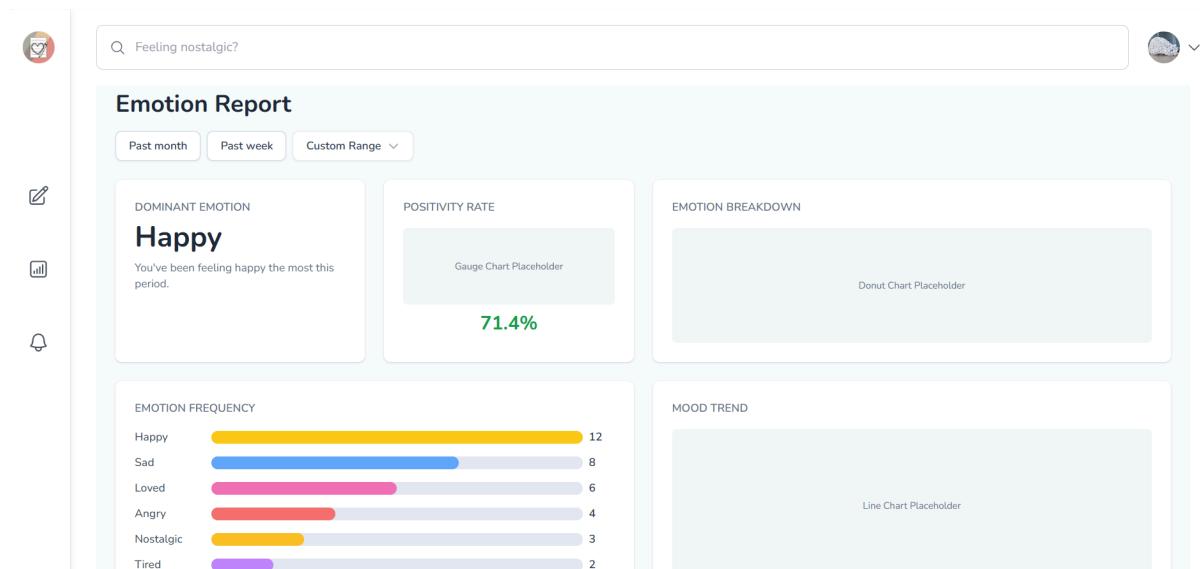

- Emotion Report Header:
 - Title: *Emotion Report*
 - User profile avatar on the top right corner
- Time Filter Options:
 - Past Month
 - Past Week
 - Custom Range (with calendar selector dropdown)
- Emotion Chart Display:
 - Donut chart illustrating proportions of each emotion
 - Chart segments use pastel colors to represent emotions
 - Legend shows emotion name and corresponding color
- Emotion Categories Displayed:
 - Happy
 - Sad
 - Angry
 - Nostalgic
 - Loved
 - Tired
- Summary Message:
 - Dynamic feedback message summarizing user's emotional trend

User Interaction:

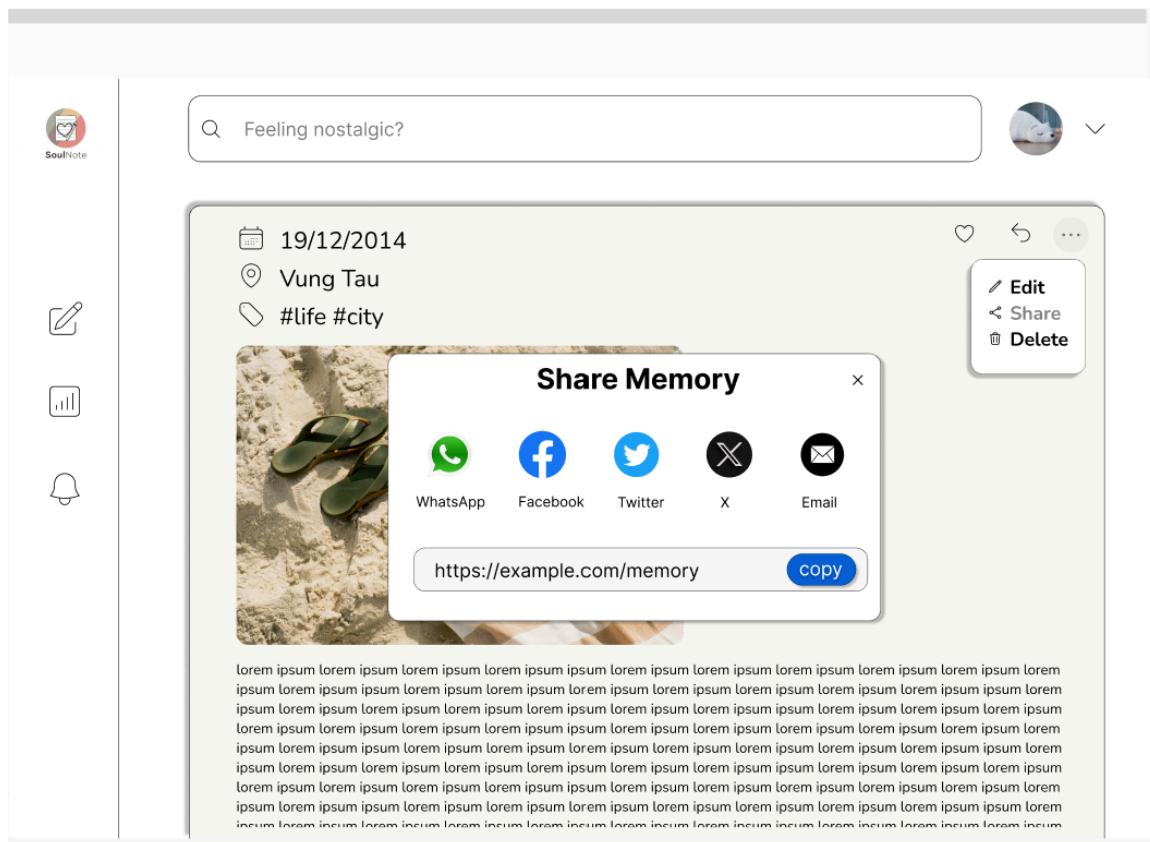

The user can switch between Past Month, Past Week, or Custom Range by clicking the corresponding buttons, and when Custom Range is selected, a calendar dropdown appears allowing them to choose specific dates. Users can hover over segments of the donut chart to see exact counts and percentages of each emotion, and the legend on the right helps them quickly identify which color corresponds to which emotion. Finally, the system dynamically updates the

summary message below the chart to reflect the selected time range and data, giving users immediate insight into their emotional trends.

Alternative UI:

2.6. Sharing Dialog

Purpose:

This dialog allows users to share a specific memory via multiple platforms or by copying a direct link.

Content:

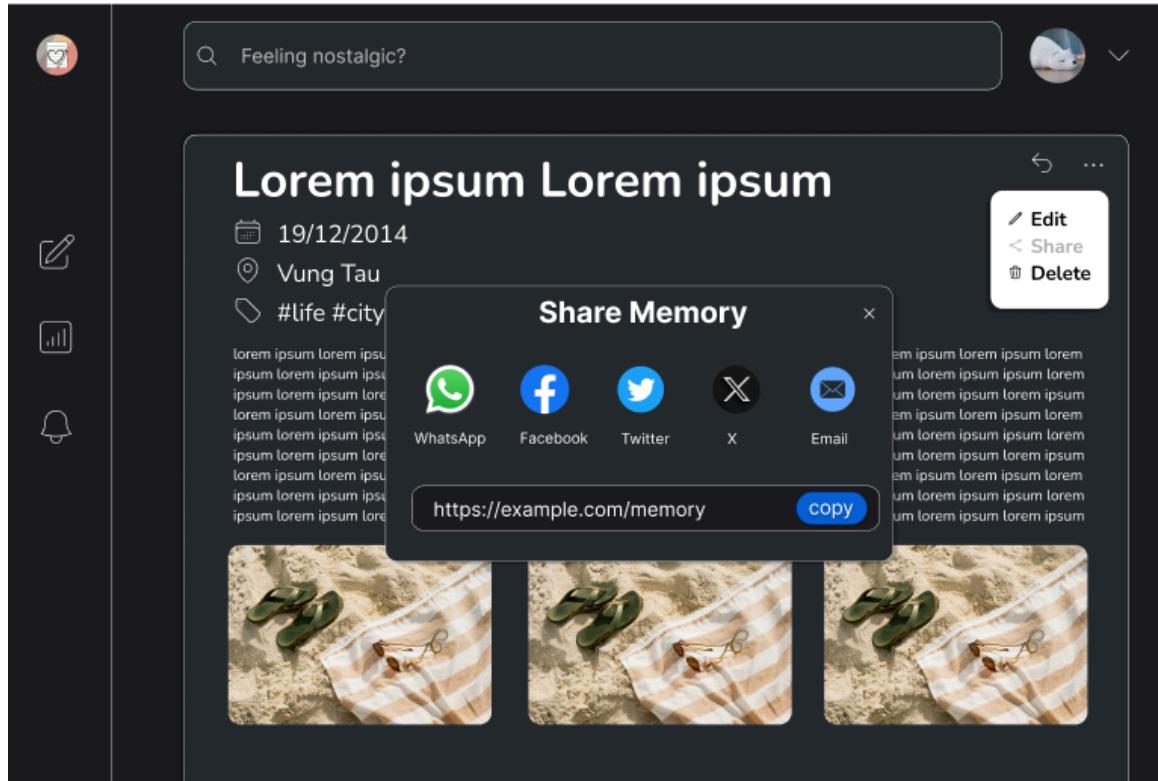

- **Title:** *Share Memory*
- **Close Button (X):** top-right corner to close the dialog
- **Buttons:**
 - WhatsApp
 - Facebook
 - Twitter
 - X (formerly Twitter)
 - Email
- **Link Box:**
 - Display the memory's shareable link
 - “Copy” button to copy the link to clipboard

User Interaction:

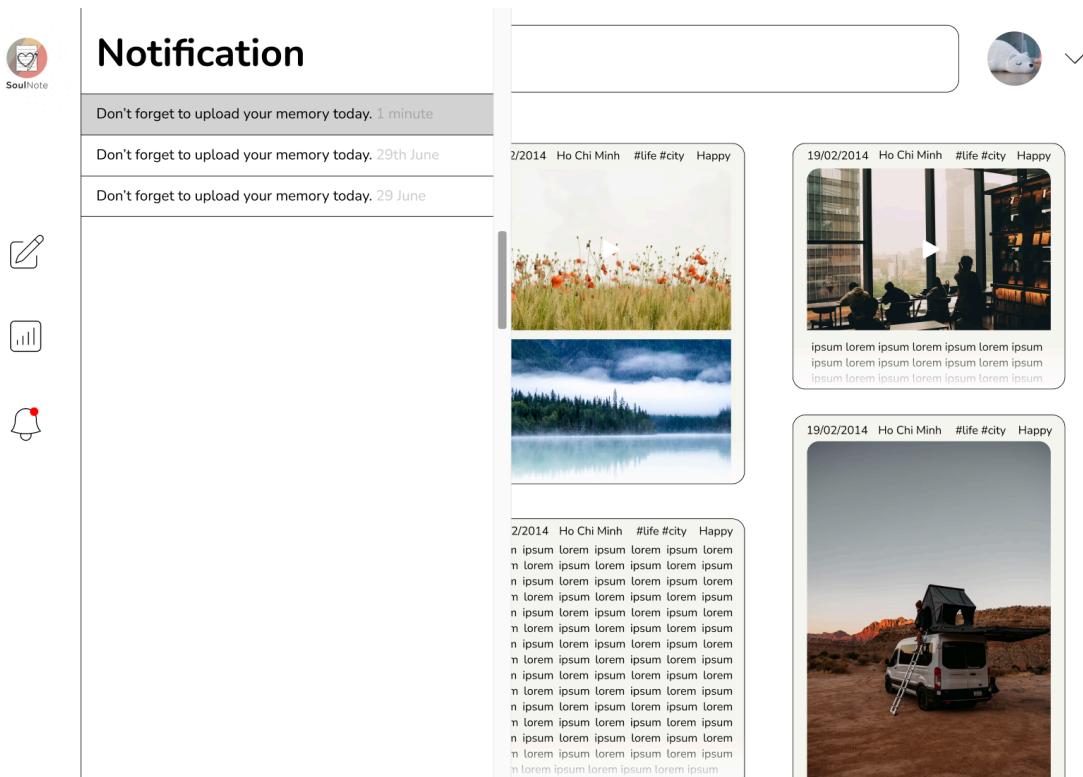

Users can click one of the available platform buttons to share the memory through a specific service, or

click the **Copy** button to copy the memory link manually. They can also close the dialog at any time by clicking the X icon in the top-right corner.

Alternative UI:

2.7. Notification

Purpose:

This screen allows users to view all notifications sent to them by the SoulNote platform.

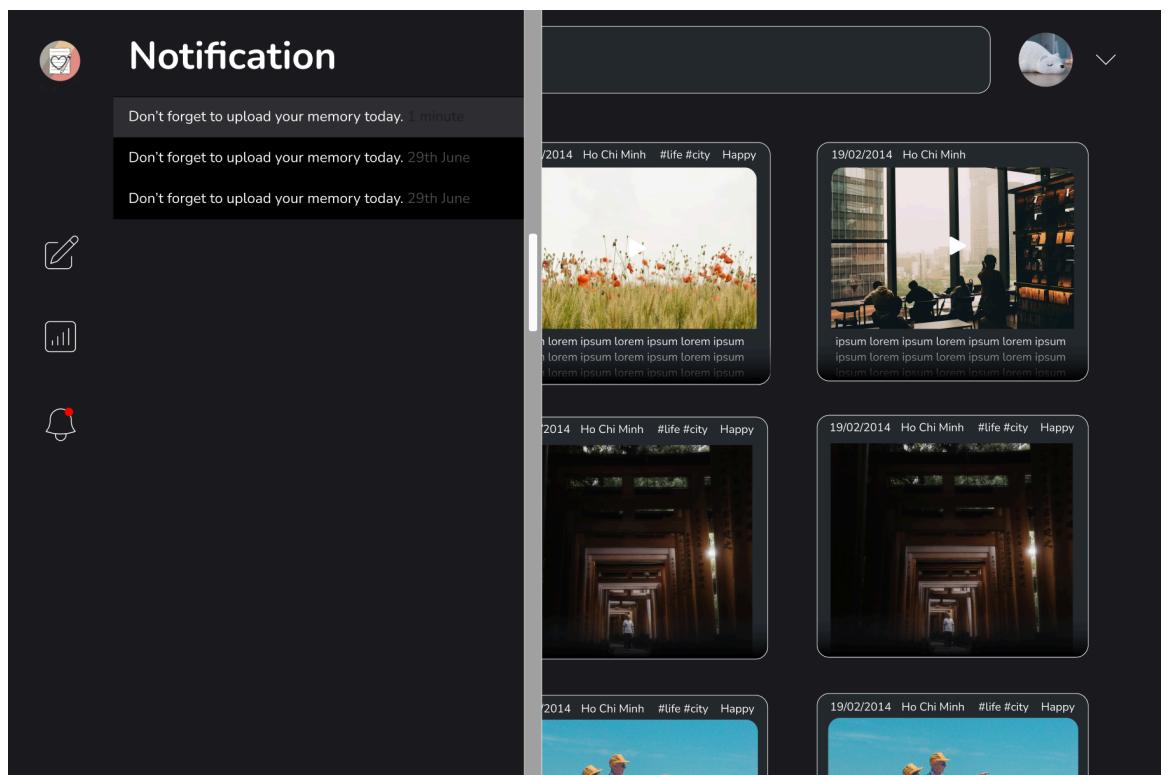

Content:

- A sidebar panel displaying a list of notifications.
- Each notification includes:
 - Title or brief content.
 - Timestamp (e.g., “2 minutes ago”).
 - A visual indicator (e.g., bold background or dot) for unread notifications.
- Notifications are sorted by newest first, with unread ones displayed more prominently.

User Interaction

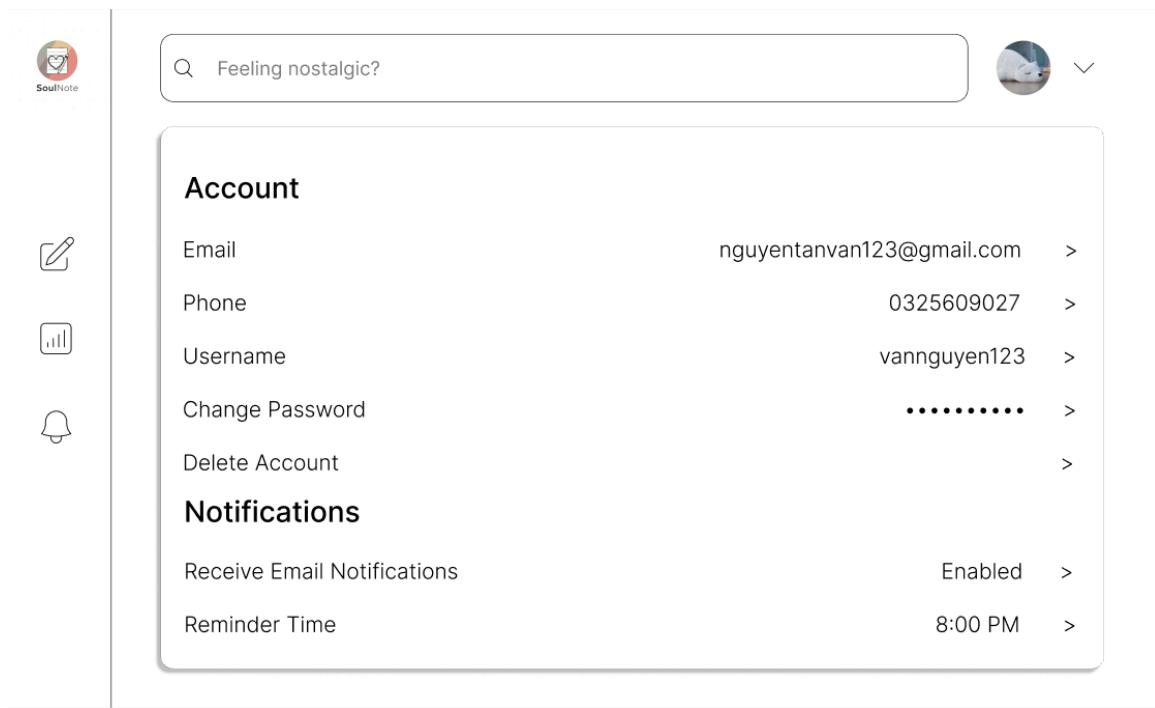

Users click the notification button to toggle the visibility of the notification panel. When the panel is open, users can scroll to browse all notifications. Clicking the notification button again will hide the panel.

Alternative UI:

3. User Settings

3.1. Setting

Purpose:

This screen allows the user to manage their SoulNote account settings, notification preferences.

Content:

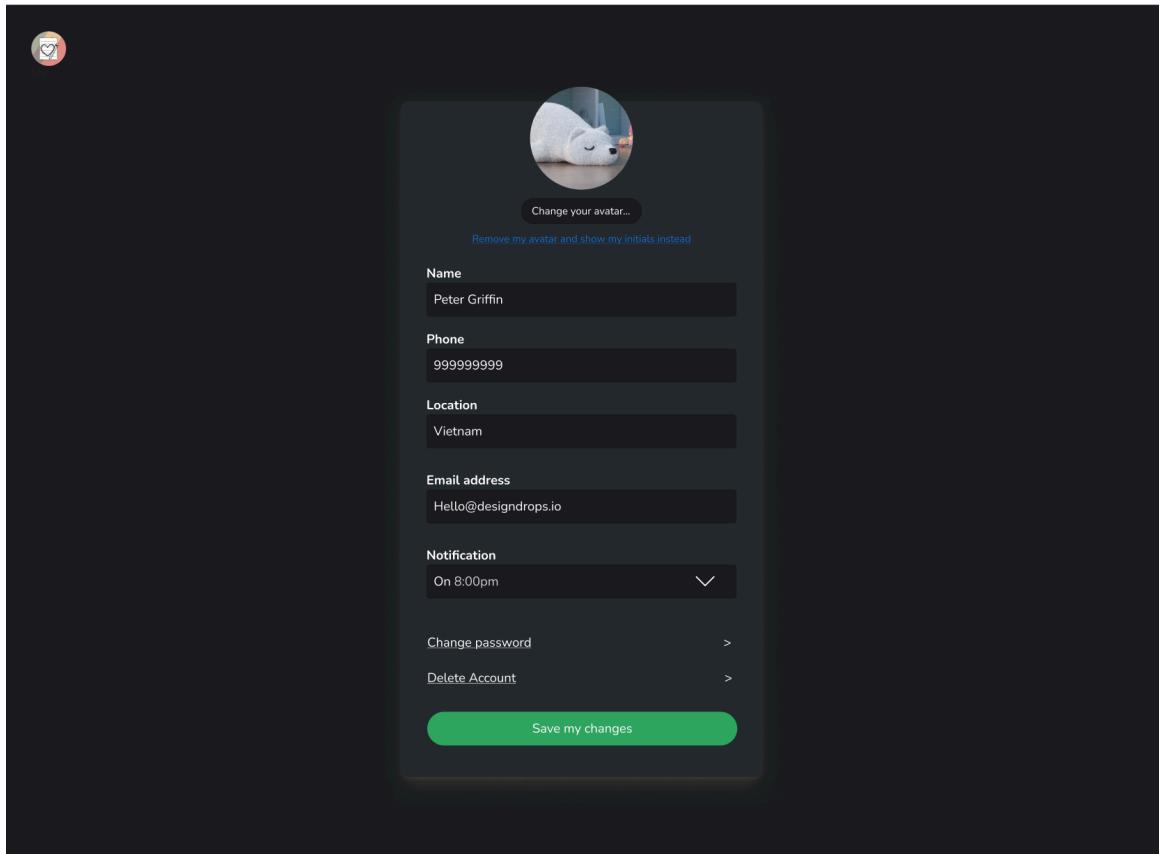

- Account Section:
 - Email
 - Phone
 - Username
 - Change Password
 - Delete Account

- Notifications Section:
 - Receive Email Notifications
 - Reminder Time

User Interaction:

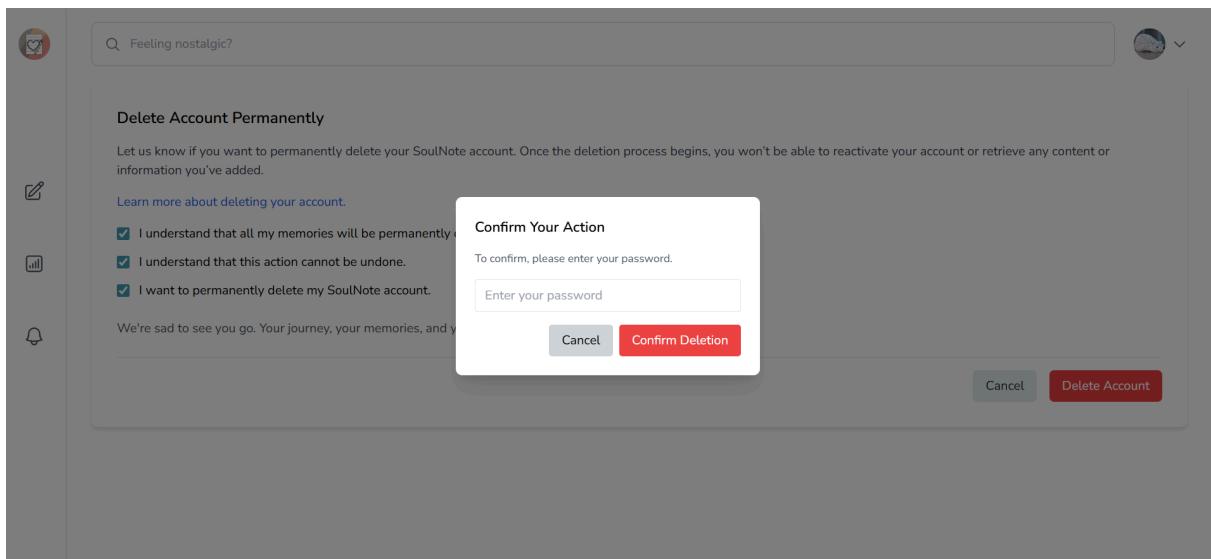

On the Settings screen, users can tap on each item to navigate to the corresponding detailed setting page. When updating account information such as email, phone number, or password, the system will display an input field or confirmation modal to ensure accuracy. Choosing "Delete Account" will trigger a confirmation process that requires the user to re-enter their password. Changes to notification preferences, such as toggling email notifications or adjusting reminder time, will be applied in real time or may prompt a confirmation depending on the action.

Alternative UI:

3.2. Delete Account

A screenshot of a delete account confirmation dialog. At the top left is a small circular icon with a heart and a checkmark. To its right is a search bar containing the placeholder "Feeling nostalgic?". On the far right is a user profile picture and a dropdown arrow. The main content area has a title "Delete Account Permanently" and a note: "Let us know if you want to permanently delete your SoulNote account. Once the deletion process begins, you won't be able to reactivate your account or retrieve any content or information you've added." Below this is a "Learn more about deleting your account." link with a pencil icon. There are three checkboxes: "I understand that all my memories will be permanently deleted.", "I understand that this action cannot be undone.", and "I want to permanently delete my SoulNote account.". Below the checkboxes is a message: "We're sad to see you go. Your journey, your memories, and your feelings have meant a lot to us." At the bottom right are "Cancel" and "Delete Account" buttons.

Purpose:

This screen allows the user to permanently delete their SoulNote account, along with all associated memories, data, and activity history.

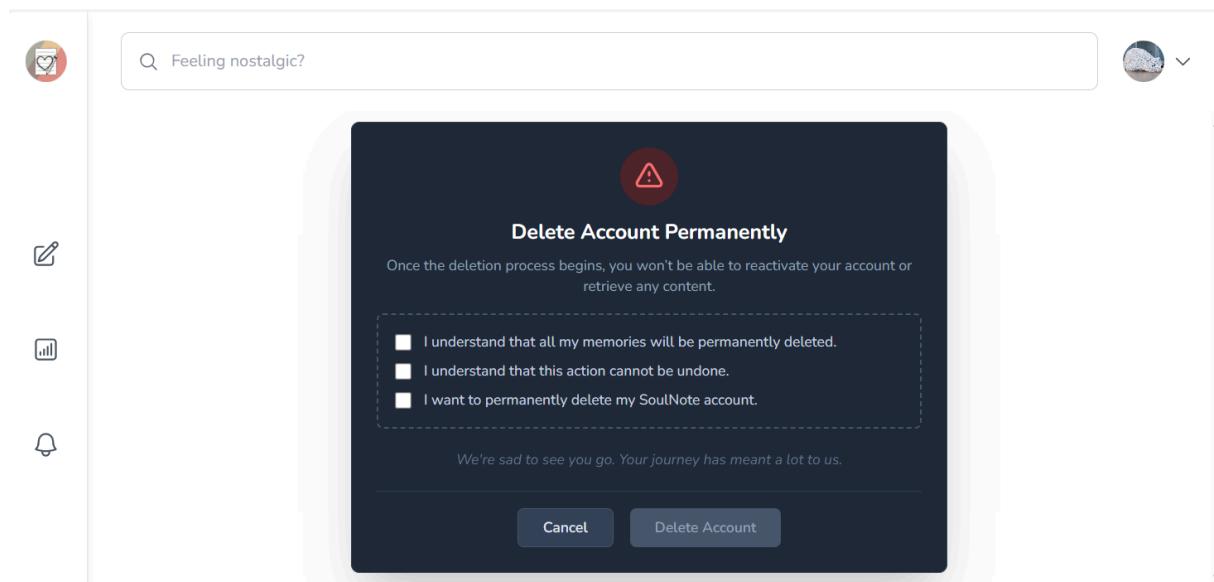

Content:

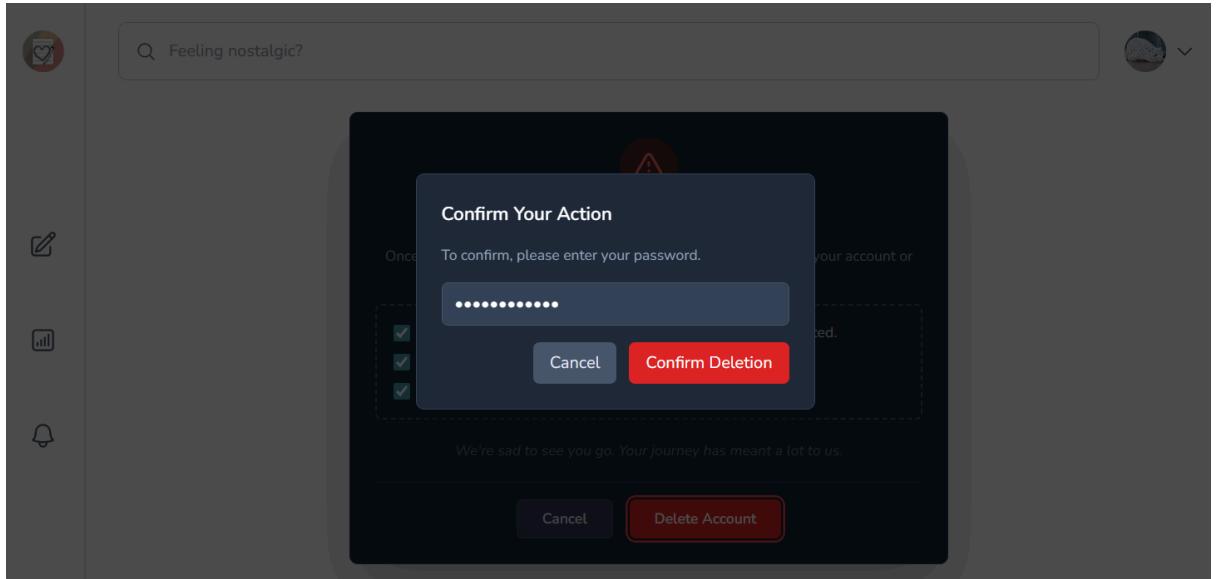

- Warning Message: Informative text explaining that account deletion is irreversible and will erase all data.
- Checkbox Confirmation List:
 - I understand that all my memories will be permanently deleted.
 - I understand that this action cannot be undone.
 - I want to permanently delete my SoulNote account.
- Password Confirmation Modal (Popup):
 - Title: "Please confirm this is your account"
 - Instructional text: "Before permanently deleting your account, please enter your password."
 - User avatar + masked password input
 - Buttons:
 - **Delete** (to confirm deletion)
 - **Cancel** (to abort the action)
- Final Message: "*We're sad to see you go. Your journey, your memories, and your feelings have meant a lot to us.*"

User Interaction:

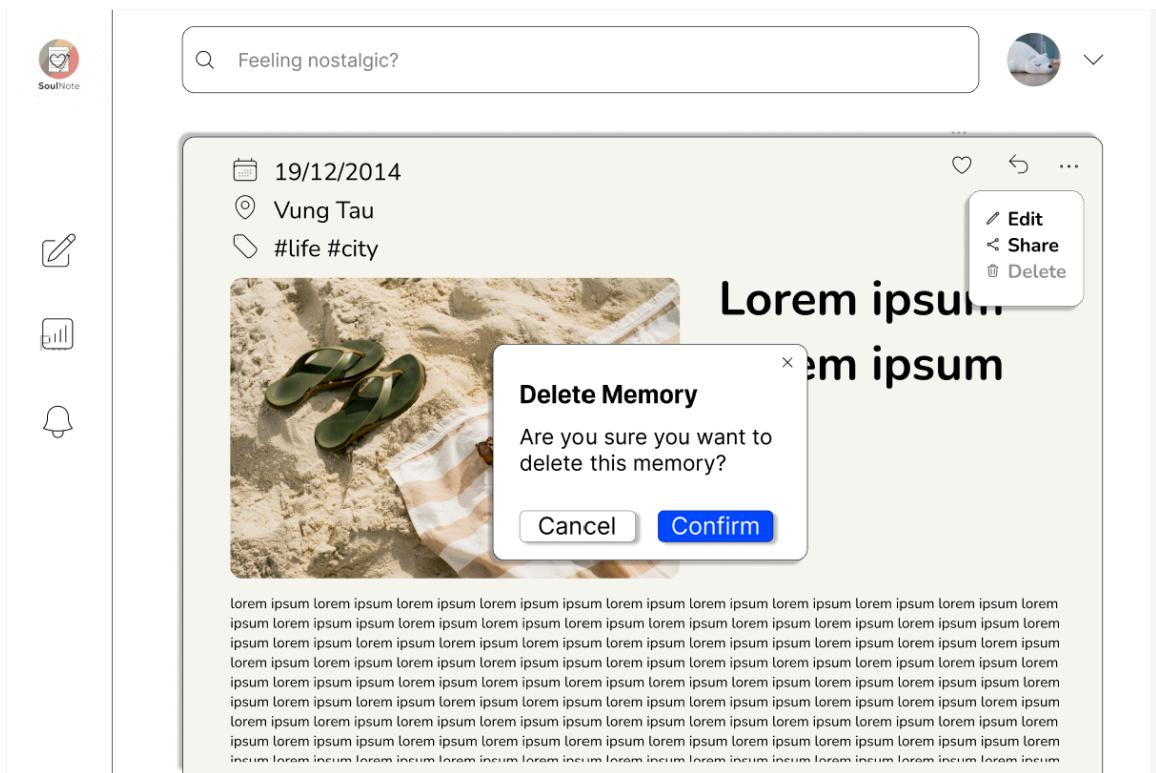

The user must check all the boxes to activate the Delete button. On clicking Delete, a confirmation modal appears prompting the user to re-enter their password. If the password is valid, the account and all related data are permanently deleted. The user is then redirected to the homepage or a goodbye screen.

Alternative UI:

3.3. Confirmation Dialog

Purpose:

This dialog is used to confirm whether the user truly wants to perform a critical action—in this case, permanently deleting a memory.

Content:

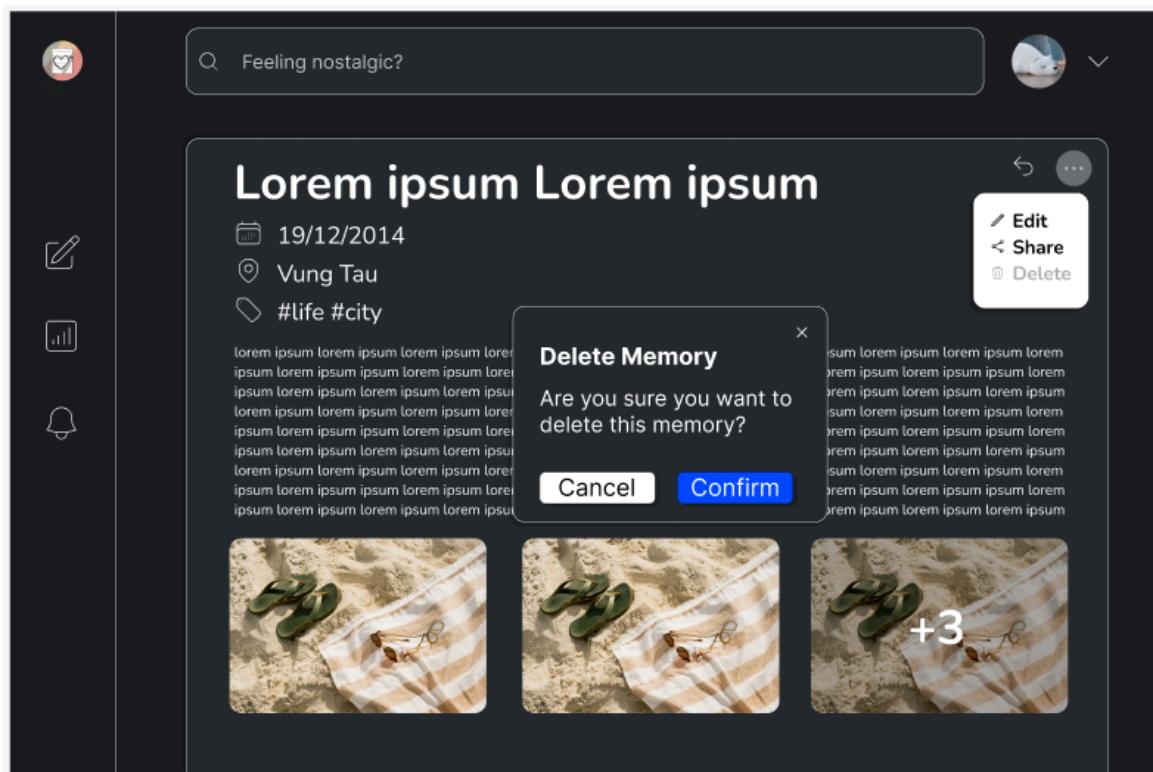

- Dialog Title: Delete Memory – clearly states the action being confirmed.
- Message Text: Are you sure you want to delete this memory? – warns the user about the consequence.
- Buttons:

- **Cancel:** dismisses the dialog without any action.
 - **Confirm:** executes the delete action.
 - **Close Icon (X):** located at the top-right corner, allows users to close the dialog like canceling.

User Interaction:

Users can read the confirmation message and decide whether to proceed with deleting the memory. Clicking **Confirm** will trigger the delete action and close the dialog, while **Cancel** or clicking the X will dismiss the popup without making any changes.

Alternative UI:

Show: 10 rows

Purpose:

This screen allows admin users to view, manage, and moderate user accounts on the SoulNote platform. It supports searching, filtering, and deleting user records, along with activity monitoring.

Content:

- **Main table:**

- **User list table** with the following columns: Full Name, Email Address, Location, Joined Date, Permissions (Admin/User)
- Each row includes:
 - Checkbox for bulk actions (e.g., delete multiple users)
 - Avatar icon

- Three-dot menu with action options: View, Edit, Reset password, View activity
- **Top filter bar:**
 - **Search bar** with dropdown option:
 - Search by name
 - Search by email
 - **Permissions filter:** Admin / User / All
 - **Join date filter:** Preset ranges like Today, Last 7 days, Last month, Custom range...
 - **Export button:** Download user data in CSV
 - **Delete User button:** Bulk delete selected accounts
 - **New User button:** Manually add new account
- **Pagination:**
 - Page selector to switch between data pages
 - “Rows per page” dropdown (e.g., 10 / 20 / 50)
- **Sidebar navigation:**
 - Left panel includes:
 - “User Management” section
 - “Activity Log” section (switch to another tab)

User Interaction:

- Admin can filter and search for users using the top bar.
- Clicking the “...” menu on each row allows for account-level actions like editing user information or resetting passwords.
- Bulk actions can be performed using checkboxes.
- Pagination helps browse through large user datasets.
- Users can navigate between **User Management** and **Activity** sections using the top tab or sidebar.

Purpose:

This screen allows admin users to monitor user activities performed on the SoulNote platform. The log provides insights into user actions such as memory creation, login, profile updates, and account changes, helping maintain security and audit trails.

Content:

- **Activity Logs Table:**
- **Columns:**
 - User

- Email address
 - Action (e.g., login, create memory, update profile, delete account...)
 - Target (optional memory title or object affected)
 - Date (timestamp of action)
- Each row includes:
 - Avatar icon
 - Sortable headers for quick filtering by date, user, or action type
- **Sidebar filters:**
 - **Search bar** to find activity by user name or email
 - **Action filter dropdown** (e.g., All, Login, Created Memory, Deleted Memory...)
 - **Date range selector** with presets like:
 - Today / This week / This month
 - Custom range (from – to)
- **Pagination:**
 - Pagination controls for navigating large activity datasets
 - "Rows per page" dropdown for choosing number of visible rows (e.g., 10, 20, 50)
- **Navigation:**
 - Located in the **Admin panel sidebar**
 - Top navigation bar allows quick switch between:
 - **User Management**
 - **Activity Logs**

User Interaction:

- Admins can use the filter sidebar to **narrow down specific user actions** during a chosen time period.
- Clicking on column headers sorts activity records accordingly.
- This screen supports **scrolling and pagination** to handle large data loads efficiently.

Alternative UI:

The screenshot shows a table titled "Activities Log" with columns: User, Email, Action, Target, and Date. The data is as follows:

User	Email	Action	Target	Date
Nguyen Le Quang	nlquang@gmail.com	Login	-	Jul 15, 2025 - 10:14
Pham Quang Thinh	pqthinh@gmail.com	Created memory	"Trip to Đà Lạt"	Jul 14, 2025 - 8:12
Ly Quoc Thanh	lqthanh@gmail.com	Edited memory	"Birthday 2025"	Jul 14, 2025 - 6:01
Huynh Van Sinh	hvsinh@gmail.com	Deleted memory	"Training Day"	Jul 10, 2025 - 15:09
Nguyen Tan Van	nvvan@gmail.com	Shared memory	"Public game project..."	Jul 10, 2025 - 11:45
Cristiano Ronaldo	ronaldo.cristiano@gmail.com	Changed password	-	Jul 9, 2025 - 10:40
Kylian Mbappe	mbappe@gmail.com	Updated profile info	-	Jul 4, 2025 - 10:40
Lamine Yamal	lamineyamal@gmail.com	Deleted account	-	Jun 29, 2025 - 8:40
Erling Haaland	erlinghaaland@gmail.com	Login	-	Jun 29, 2025 - 3:41

Below the table are navigation buttons (back, forward, page numbers 1-10, next) and a "Show: 10 rows" dropdown.

The screenshot shows the same table as above, but with an expanded search/filter section. A dropdown menu is open over the "User" column, listing "Search by name" and "Search by email". Another dropdown menu is open over the "Action" column, listing various actions like Login, Created memory, Edited memory, etc. The rest of the interface is identical to the first screenshot.
